SHAFER'S SELECTIONS FOR 1955

A PERSONAL INVITATION

Next time you are in or near Santa Cruz 75 miles south of San Francisco, on beautiful Monterey Bay—we would be pleased to meet you personally and show you our growing stock. We urge you, whenever possible, to select your Violets and other plants in person, for fullest satisfaction and pleasure. Also, prices at our greenhouse are slightly lower than list, due to the costs of packaging and handling. It is always our pleasure to meet flower lovers; we take a great deal of pride in our stock and enjoy showing it to visitors. There is never any obligation of course. Besides our African Violets, we also have on view extensive collections of Orchids and other tropical plants.

Plants listed here are all ready to bloom or blooming, and are well-established, single crown, exhibition-type plants in 2½ inch pots. All soils used by us are fumigated by methyl bromide treatment, assuring you of healthy, vigorous plants.

California purchasers will not have their plants delayed for inspection except in Ventura and Tulare Counties, which are not yet in the "Pinto Tag" program. The "Pinto Tag" on your shipment certifies that our greenhouses have been California State inspected and certified clean.

For Violet fertilizer, we use and can highly recommend SPOON-IT. Mixed with water, SPOON-IT has proved an ideal plant food for Violets.
